INTRODUCTION

a. 2016 Premium Rates Summary

On August 27, 2015, the Workplace Safety and Insurance Board (WSIB) announced that premium rates will remain the same for 2016, making this the third consecutive year that employers have not seen an increase in premium rates. Only Rate Group 845, "Government and Related Services", did see an increase in 2015 due to expanded coverage mandated by the Ministry of Labour under the presumptive legislation for firefighters.

Our Board of Directors' decision to keep rates at 2015 levels was made based on careful actuarial and financial analysis. The decision provides stability for employers as the WSIB moves toward a new Rate Framework in consultation with stakeholders, to develop an improved rate setting methodology.

We intend on working cooperatively and constructively with all our partners to ensure that we are meeting their needs, with a focus on excellence in customer service and sensitivity to the needs of their business. We intend on listening carefully to employers to build on the progress we've made in recent years and take the WSIB in new and necessary directions.

Thanks to recent transformation initiatives, the WSIB is in a steadily improving financial position. Changes to the way we do business implemented over the last few years have had a startlingly positive effect on the WSIB's finances. We are on a clear path to being fully-funded. After hitting a high of $14.2 billion in 2011, the UFL today stands at $6.8 billion. The system is over 78 per cent funded and on the way to meeting the legislated funding requirements of 80 per cent by 2022, and full funding by 2027. These improvements have been made all while maintaining benefits for injured workers and achieving the best health and safety outcomes in Canada.

The WSIB continues to work with the Chair's Advisory Committees, which represent both employers and injured workers. These committees have provided valuable advice and guidance to the WSIB Chair, President and CEO, and Executive Committee; and their input was taken into account as part of the decision-making process on which the 2016 premium rates were based.

b. Derivation of Premium Rates

The Schedule 1 costs of the workers' compensation system are funded through premium rates, which are applied to the payroll of Schedule 1 employers. All Schedule 1 employers are not charged the same rate. Rather, for the purpose of charging them on a more equitable basis, employers are classified into rate groups. Rate groups are defined in a classification scheme and each rate group has a different premium rate, originally intended to reflect the inherent risk of the specific business activities of industries insured within that group.

The classification scheme divides business activities into nine broad classes, which are further subdivided into 155 rate groups based on similarity of business activity and relative risk. The number of rate groups remains unchanged from 2015. Additional details about the classification scheme itself can be obtained from the WSIB's *Employer Classification Manual (ECM)* on the WSIB website at www.wsib.on.ca.

Premium rates are expressed as a dollar amount per $100 of insurable earnings. For each of the classes and rate groups defined in the classification scheme, their premium rate includes an amount for:

a) New claims cost - the expected future lifetime costs to pay benefits for all new claims for the premium year;

b) The WSIB's expenses to administer the *WSIA*, the Ministry of Labour's (MoL) expenses to administer the *Occupational Health and Safety Act*, the Workplace Safety and Insurance Appeals Tribunal, Offices of the Employer Adviser and the Worker Adviser, and the expenses of the Health and Safety Associations and research; and

c) Past claims cost – includes a charge to retire the WSIB's unfunded liability.

Although rate group premium rates are unchanged from 2015, the amounts attributable to each of these three components were revised for 2016 using claims experience and insurable earnings data from the most recent six years – that is, for the period from 2009 through 2014 inclusive. Details supporting premium rates are shown in the various exhibits of this *Premium Rates Manual*.

An annual maximum ceiling for average earnings used for determining benefits and premiums is set each year according to the *Workplace Safety and Insurance Act*. The ceiling for the premium rate year (2016) is based on 175% of the average industrial wage for Ontario from the most recent published Statistics Canada earnings data available on July 1st of the previous year (2015). The 2016 maximum insurable earnings ceiling is $88,000, an increase of 3.3% over the 2015 ceiling of $85,200.

C. Classification Scheme and Data Sources

Schedule 1 employers are divided into nine classes (denoted by class codes A through I). Employers within each class are then subdivided into rate groups. The grouping of employers within a single rate group is based on similarity of business activities and/or relative risk. The number of rate groups in each class varies according to the size of the economic sector covered by each class. For example, Class B: Mining and Related Industries, contains four rate groups, whereas Class D: Manufacturing, contains 73 rate groups.

Rate groups are further divided into classification units. Classification units are used as a means of tracking the relative experience of various employer subgroups. Firms in a classification unit share similar business activities or other characteristics. All employers within a single rate group, no matter which classification unit they belong to or their payroll size, are charged the same premium rate (before any merit adjustments or experience rating). Premium rates are not calculated for classification units.

The classes referred to in this manual should not be confused with industry sectors, which are another categorization used by the WSIB to compare common business practices and approaches.

The figures shown in the Supporting Documentation sections of this manual are based on the data available as of June 2015. Employers may obtain more recent information by contacting the WSIB (see Section 11 of this manual for contact information).

d. The Role of the Workplace Safety and Insurance Board (WSIB)

The WSIB is a statutory corporation created by an Act of the Ontario Legislature in 1914. The WSIB is responsible for administering the *Workplace Safety and Insurance Act, 1997* (*WSIA*). The Ministry of Labour is responsible for administering the *Occupational Health and Safety Act*.

The WSIB receives no government funding and is funded solely through employer premiums. Revenue is also raised through returns on invested assets.

The WSIB helps workers deal with the consequences of workplace injuries and illnesses – providing a comprehensive bundle of insurance benefits and helping workers recover and return to work. The WSIB:

- Provides benefits to injured and ill workers and to the dependants of workers who have died as a result of a workplace injury or illness; and
- Assists in the return to work and recovery of injured and ill workers.

Employers covered by the *WSIA* are divided into two groups, referred to as "Schedule 1" and "Schedule 2." Schedule 1 employers are insured under a "collective liability" system, and are required to contribute to the WSIB Insurance Fund. Schedule 2 employers are "self-insured," and are individually liable for the full costs of their workers' WSIB claims. The WSIB pays insurance benefits for Schedule 2 workers and is reimbursed by Schedule 2 employers for costs (including administrative costs) of the claims.

This *Premium Rates Manual* pertains to Schedule 1 employers only, including non-compulsory covered employers and Schedule 2 employers that have successfully applied for coverage under Schedule 1.

Commission de la sécurité
professionnelle et de l'assurance
contre les accidents du travail

DEFINITION OF 2016 PREMIUM RATE COMPONENTS

A. New Claims Cost

1.	New Claims Cost	The estimated full cost of new claims for injuries expected to occur during 2016

B. Overhead Expenses

1.	Administrative Expenses	Expenses of the WSIB estimated for the year 2016, to administer the *WSIA*
2.	Legislative Obligations	Expenses the WSIB is required to fund under the *Occupational Health and Safety Act*, the Workplace Safety and Insurance Appeals Tribunal, Office of the Employer Advisor, Office of the Worker Advisor, Health and Safety Associations and research
3.	Total Overhead Expenses	Total of Administrative and Legislative Obligations expenses

C. Past Claims Cost

1.	Past Claims Cost	Includes payment required to retire the unfunded liability

D. Premium Rate

Total cost per $100 of insurable earnings required to fund new claims, overhead, and past claims

contre les accidents du travail

SUMMARY OF ALLOCATION RULES FOR 2016 PREMIUM RATES

A. New Claims Cost

New Claims Costs are determined at the class level. However, rate groups belonging to a class pay them.

The share of the class new claims cost charged to a member rate group is based on the expected number of claims and the average cost of a claim expected for that rate group for the premium year.

The average cost of a claim for a rate group is determined via a Cost Index, which indicates the relative costliness of an average claim for the rate group as compared to the average cost for its class.

B. Overhead Expenses

Schedule 1 overhead expenses are allocated to rate groups in proportion to their new claims cost and insurable earnings.

C. Past Claims Cost

Past Claims Cost paid by a rate group is the remainder of its 2016 premium rate (which is set equal to its 2015 premium rate) after New Claims Cost and Overhead expenses have been deducted.

981	MEMBERSHIP ORGANIZATIONS	0.79
983	COMMUNICATIONS INDUSTRIES	0.37
	CLASS I : OTHER SERVICES	**1.34**
	SCHEDULE 1	**2.59***

* The Schedule 1 and class average premium rates are determined based on the mix of insurable earnings across rate groups. Although all rate group rates have remained the same from 2013 to 2016 (except for Rate Group 845 "Government and Related Services" that had a rate increase in 2015 due to expanded coverage for presumptive legislation for firefighters), the WSIB's industry mix has changed since 2013 resulting in a Schedule 1 average premium rate different from the 2013 average rate of $2.46. Without these shifts in industry mix over time the average premium rate would still be $2.46 for 2014, 2015, and 2016.

H	GOVERNMENT AND RELATED SERVICES	7,141	1.42
I	OTHER SERVICES	6,852	1.34
	SCHEDULE 1	**11,442**	**2.59***

* The Schedule 1 and class average premium rates are determined based on the mix of insurable earnings across rate groups. Although all rate group rates have remained the same from 2013 to 2016 (except for Rate Group 845 "Government and Related Services" that had a rate increase in 2015 due to expanded coverage for presumptive legislation for firefighters), the WSIB's industry mix has changed since 2013 resulting in a Schedule 1 average premium rate different from the 2013 average rate of $2.46. Without these shifts in industry mix over time the average premium rate would still be $2.46 for 2014, 2015, and 2016.

ONTARIO

Workplace Safety
& Insurance Board

Commission de la sécurité
professionnelle et de l'assurance
contre les accidents du travail

NON-CREDIBLE RATE GROUPS

Ideally, each rate group defined in the Workplace Safety and Insurance Board's classification scheme should be credible, that is, large enough so that reasonably reliable estimates can be made for deriving premium rates from a rate group's own claims experience. Although this is generally the case, particular industries or services in Ontario can decline substantially as the economy undergoes changes and this can lead to a situation where a previously credible rate group becomes non-credible. In addition, some rate groups have reduced the number of injuries to a level where there is not enough information available to estimate the average cost of a claim and, as a result, the rate group becomes non-credible. As part of the ongoing activity of rate making, the Workplace Safety and Insurance Board (WSIB) monitors the credibility of rate groups.

Since the original development of the WSIB's current classification scheme, which was introduced in 1993, a number of rate groups have become non-credible. Different approaches have been used to address the issue of non-credibility (e.g. through some form of rate group merger) depending on the circumstances of each rate group.

Data supporting the 2016 premium rates shows that under current criteria seventeen rate groups are not fully credible. It is possible that the experience of some of these rate groups may return to a fully credible level but the rest are likely to remain non-credible. With regards to addressing this issue, however, any modifications to the industry classification scheme will be deferred to be incorporated into the upcoming implementation of a new rate framework.
